SAI KIRAN PATRO

Front-End Engineer | Full-Stack | AI Agents | React & TypeScript

Hyderabad, India | +91 9182863688 | saikiranpatro198@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Front-end focused full-stack engineer with 4 years of experience delivering scalable React and TypeScript applications backed by Node.js, Python and GCP services, including a subscription center serving 1.8M active users. Builds AI-agent products: real-time voice agents, multi-agent LangGraph and Vertex AI workflows and RAG solutions, with working experience in OCR and system-prompt engineering. Containerized and deployed on Kubernetes.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++
Front-End: React, Redux, Tailwind CSS, HTML, CSS, responsive design
Back-End & APIs: Node.js, Express, FastAPI, REST, WebSockets
AI Agents & GenAI: AI agents, OpenAI Agents SDK, LangGraph, Google ADK, Vertex AI, RAG, MCP, voice agents, OCR, system-prompt engineering, guardrails
Cloud & Data: GCP, GKE, Cloud Run, Docker, Kubernetes, MongoDB, MySQL, Firestore, pgvector
Tools: Git, GitHub, Claude Code, OpenAI Codex, Cursor, Grok

PROFESSIONAL EXPERIENCE

RealPage | Software Development Engineer 2 – AI Engineer — **Jun 2025 – Present**
Hyderabad, India

Multi-Agent Web Application

- Built the React interface for high-volume usage on top of LangGraph and Vertex AI workflows that I solely architected (research, outreach and invoice-ingestion agents).
- Containerized AI microservices with Docker and deployed them on Google Kubernetes Engine (GKE).
- Reduced input-token cost by 6% through prompt optimization.

Lumina AI Screen Share (Spotlighted by OpenAI)

- Developed a real-time voice agent with screen sharing and an interactive feedback interface using the OpenAI Agents SDK and Node.js.
- Maintained sub-2-second end-to-end voice latency by tuning Voice Activity Detection (VAD), endpointing and turn-taking.
- Integrated conversation summarization with Salesforce REST APIs and migrated voice records from legacy Transcript to Messaging objects.
- Improved agent reliability through system-prompt optimization, guardrails and function-tool calling.

Tata Consultancy Services | Software Engineer – Full-Stack Developer — **Jun 2022 – May 2025**
Hyderabad, India

- Built a scalable React subscription center serving 1.8M active users.
- Developed an automotive RAG chatbot with Node.js, Express and the Gemini API for vehicle and offer-related queries.
- Delivered a referral-offer code program associated with a reported 80% increase in sales.

PROJECTS & OPEN SOURCE

- **TowerLink AI** (demo): full-stack chat app with JWT authentication, user profiles, protected routes and a responsive interface. *React*, *Node.js*, *Express*, *MongoDB*, *Tailwind CSS*
- **http-query-method** (npm): published zero-dependency npm package for HTTP QUERY requests with validation, retries, POST fallback and TypeScript support. *JavaScript*, *TypeScript*, *Fetch API*
- **NeuraLensAI** (post): screen-aware conversational voice assistant; top 30% of ~4,000 Codex Hackathon participants. *OpenAI Codex*
- **Pulse Music AI** (demo): personal music-player application with a published video demonstration.

EDUCATION & CERTIFICATIONS

B.Tech, Electronics & Communication Engineering — **2018 – 2022**
Anil Neerukonda Institute of Technology and Sciences | CGPA: 8.7 / 10

- **Certification: Frontend Expert**, AlgoExpert (verify) | Data Structures & Algorithms, Coding Ninjas (verify)
- **Achievements:** REALSTARS Award for technical excellence, RealPage (evidence) | 400+ DSA problems solved
