PROFILE

Frontend-focused full-stack engineer building scalable React and TypeScript products and production AI agents. Delivered a subscription center serving **1.8M active users** and real-time voice experiences with **sub-2-second latency**. Owns solutions from interface and API design to multi-agent orchestration and cloud deployment.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Redux, Tailwind CSS, HTML, CSS, responsive design

Backend & data: Node.js, Express, Python, FastAPI, REST, WebSockets, MongoDB, MySQL, Firestore, pgvector

AI: OpenAI Agents SDK, LangGraph, Google ADK, Vertex AI, RAG, MCP, voice agents, OCR, prompt engineering, guardrails

Cloud & tools: GCP, GKE, Cloud Run, Docker, Kubernetes, Git, GitHub, Claude Code, OpenAI Codex, Cursor, Grok, C++

PROFESSIONAL EXPERIENCE

RealPage | SDE 2 - AI Engineer

Jun 2025 - Present

Multi-agent web application | React, LangGraph, Vertex AI, Docker, GKE

- Built the React interface and solely architected multi-agent workflows for research, outreach, and invoice ingestion using LangGraph and Vertex AI.
- Containerized AI microservices with Docker and deployed to Google Kubernetes Engine; reduced input-token cost by **6%** through prompt optimization.

Lumina AI Screen Share | Spotlighted by OpenAI

- Developed a real-time voice agent with screen sharing and interactive feedback using the OpenAI Agents SDK and Node.js.
- Maintained **sub-2-second end-to-end voice latency** by tuning VAD, endpointing, and turn-taking; improved reliability with guardrails and function-tool calling.
- Integrated conversation summaries with Salesforce REST APIs and migrated voice records from legacy Transcript to Messaging objects.

Tata Consultancy Services | Software Engineer - Full-Stack

Jun 2022 - May 2025

- Built a scalable **React subscription center serving 1.8M active users**.
- Developed an automotive RAG chatbot using Node.js, Express, and the Gemini API for vehicle and offer queries.
- Delivered a referral-offer code program associated with a reported **80% increase in sales**.

SELECTED PROJECTS & OPEN SOURCE

- **http-query-method** | npm package - Published a zero-dependency package for HTTP QUERY requests with validation, retries, POST fallback, and TypeScript support.
- **TowerLink AI** | Demo - Full-stack chat app with JWT authentication, user profiles, protected routes, and responsive UI. React, Node.js, Express, MongoDB, Tailwind CSS.
- **NeuraLensAI** | Project story - Screen-aware conversational voice assistant; top 30% of approximately 4,000 Codex Hackathon participants.
- **Pulse Music AI** | Demo - Personal music-player application with a published video demonstration.

EDUCATION & RECOGNITION

B.Tech, Electronics & Communication Engineering | 2018 - 2022

Anil Neerukonda Institute of Technology and Sciences | **CGPA: 8.7 / 10**

Certifications: Frontend Expert - AlgoExpert | Data Structures & Algorithms - Coding Ninjas

Recognition: REALSTARS Award - RealPage for technical excellence | 400+ DSA problems solved
